Max, Kurt and Axel Stürken (from left to right)

Dear collectors,

Passion and pleasure are two terms that we, at LIGHTHOUSE, have associated with our accessories for more than a century. More than 6,000 products now bear the LIGHTHOUSE brand name, which has become a symbol of practicality and quality. Consequently, we are extremely pleased to be able to present this edition of the catalogue for stamp accessories which contains an extensive range of items for the stamp enthusiast.

Since the beginning of the year, in addition to product images and texts, we have also been using video clips to optimise the presentation of selected products. As you leaf through this catalogue, please note the QR codes on some of the pages. If you scan them with your smartphone camera, you will be taken directly to the respective **product video**.

Every avid stamp collector is familiar with the HAWID brand. Since 1st September 2021, the popular **HAWID stamp mounts** have been part of LIGHTHOUSE's portfolio. Please turn to pages 74–77 to find an extensive range of strips, block mounts, cut-to-size mounts and other accessories.

Our new **KURT top-quality leatherette zip up ring binder case** is ideal for transporting coins, stamps, banknotes, postcards, etc. Your collection is safe from prying eyes thanks to the robust zip.

We conducted a **customer survey** a while back, and were exceptionally pleased to receive such positive feedback concerning our products, customer service and the good value for money that we offer. We intend to keep it this way. That is the reason why your feedback is particularly important to us, so that we can satisfy your needs in the future too. Please continue to support us with your comments, suggestions and even criticisms.

Everyone needs to have a passion for something! We hope you enjoy browsing our catalogue for stamp accessories.

Use the quickfinder to find your way around the catalogue!

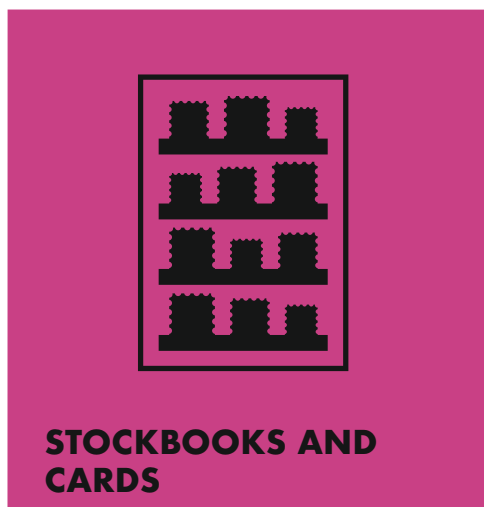

The accessories catalogue is subdivided into different categories. One category is “optical accessories”, for example. Every category is assigned a colour, i.e. “optical accessories” is orange. On the following pages, you will find a coloured section on the right-hand margin which indicates the colour of the respective category. This means you will be able to recognise immediately which category you are looking at. The quickfinder primarily helps you to jump to the desired accessory category, without having to look through every single page of the catalogue. Try it out!

Stockbooks and stockcards

When we mention stockbooks, we refer to stamp albums with card pages featuring horizontal glassine or film strips, into which the stamps are inserted. Even if part of the collection is stored elsewhere, e.g. in illustrated albums, stockbooks can serve as storage space for duplicates, as a mobile solution e.g. for trading or to accommodate the most valuable pieces in a deposit box and are an essential piece of kit for philatelists.

On the following pages, you will find over 70 different varieties to match every taste and use. Please choose the size of your stockbook, the colour of the card, the number of pages and the material and colour of the binding.

More information about the characteristics and suitability of our sheets is available on our website at www.leuchtturm.com

Brand quality made by LIGHTHOUSE

Please be aware of the subtle differences between our stockbooks when making your selection:

The **embossed gold or silver stripes** give our covers their particularly noble finish.

Double-sided interleaves (glassine or clear film) guarantee optimum protection for your stamps.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

High-grammage card. Choose between white and black pages.

Heavy duty **leather*** with a **leatherette cover** or elegant **genuine-leather cover.** * LEFA = bonded leather material consisting of leather fibres and other sustainable natural raw materials.

Matching **slipcases** are available separately for COMFORT, COMFORT DELUXE, PREMIUM and LEATHER formats (see following pages).

LEFA = Leather fabrics (bonded leather) is a book-binding material consisting of leather fibres and other sustainable, natural raw materials (natural tanning agents, natural latex, natural fats and dyes).

By felting the leather fibres, the LEFA material has almost all the important characteristics of natural leather. No other material comes so close to natural leather in terms of quality and workmanship as LEFA.

The LEFA cover material we use is characterised by optimum physical characteristics (tensile strength, strong seams, durability, tear resistance, etc.).

The box with active protection against ageing and oxidation

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT® material inside. Ideal for protecting paper, coins and medallions. Illustrated albums

Sophisticated philately requires a professional footing and attention to detail. The LIGHTHOUSE-branded illustrated albums are expertly made with great attention to detail, hence the high quality of material and manufacturing is vital.

Furthermore, LIGHTHOUSE provides the stamp collector with an entire range of philatelic accessories to satisfy all their needs. LIGHTHOUSE illustrated albums fulfil the demands of even experienced and expert philatelists with a huge selection of over 120 collection areas and editorial, philatelic compilation by our specialist editors.

To store your collection in style, we offer binders with various mechanisms in a range of designs in the same high quality. Binders featuring extremely high-quality, heavy duty covers with gold embossing have become firm favourites for collectors.

The advantages of LIGHTHOUSE illustrated albums

LIGHTHOUSE album pages (270 x 297 mm/13-hole system) are printed in high-resolution black and white offset print on non-ageing wood and acid-free card (170 gsm).

We deliberately avoid colour printing. This allows you to immediately spot the missing stamps in your collection. HAWID mounts in sizes which match the stamps, made from clear, anti-glare polystyrene film, free from chemical softener are glued to the card of the albums. The stamp mounts hold the stamps securely in place and prevent them from sticking. They offer optimal protection against dust and damage.

Lots of LIGHTHOUSE album pages are also available without HAWID stamp mounts in the so-called "regular" version.

The individual characteristics of similar stamps which vary in e.g. colour, perforation or printing process are noted on the respective album sheets. This only applies to stamps with MICHEL (major) or Stanley Gibbons numbers and includes the year where required.

In this way we always ensure an aesthetically pleasing overall presentation.

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for the stamp thanks to the matching HAWID stamp mounts (made of 100% polystyrene, free from chemical softeners and stabilisers).

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

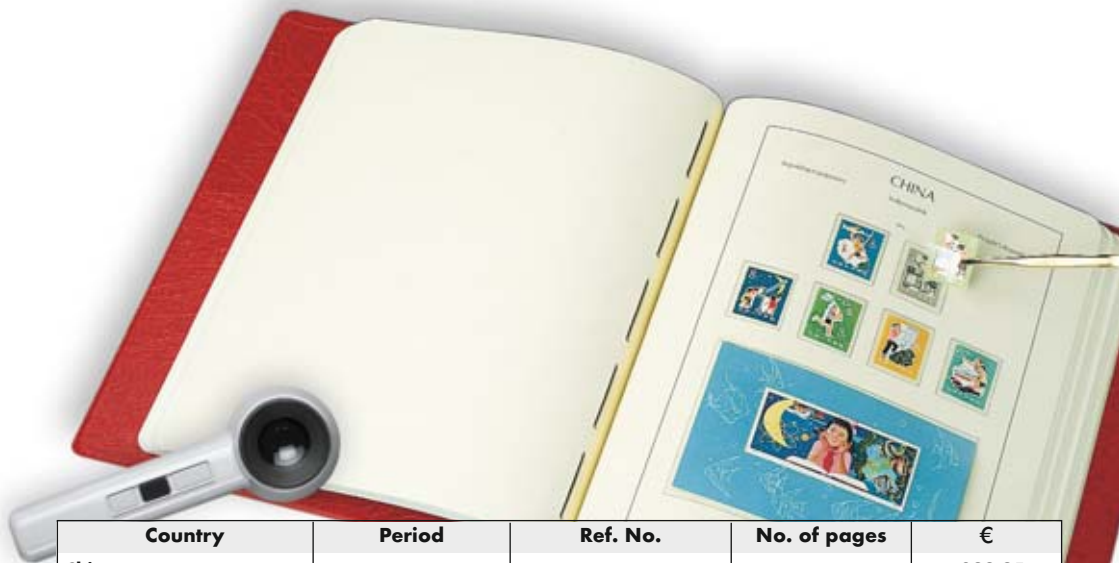

Sheets match 4 different binder types (Springback binder, 13 ring binder, turn-bar binder and bolt binder).

Supplements:

You can always keep your LIGHTHOUSE albums up to date with the annual supplements. Supplements are published each year for stamps issued in the previous year.

LB-sheets

LB-sheets are card sheets in album format which come with a welded protective pocket. The film for our LB-sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents.

The practical LB-system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB-pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery.

The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

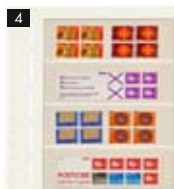

Overall size of the LB page is: 270 x 297 mm

HAWID stamp mounts

Every avid stamp collector is familiar with the HAWID brand. Since 1st September 2021, the popular HAWID stamp mounts have been part of LIGHTHOUSE's portfolio. The stamp mounts are made of polystyrene (PS), which is PH-neutral and does not contain chemical softeners. This extensive range comprises strips, block mounts and pre-cut mounts. The stamp mounts are available with either a black or a clear backing film.

Besides the stamp mounts, you will also find a stamp mount cutter for trimming the stamp mounts to the size required, a special adhesive to affix the stamp mounts onto the album pages as well as a glue stick for sticking together two sheets of film.

The HAWID range of stamp mounts

1. HAWID strips

217 mm (8 1/2") long, in various heights. The strip is 4 mm higher than the given stamp size, to give an all around margin. Cut the width to your requirements.

2. HAWID block mounts

217 mm (8 1/2") long, in various heights. The strip is 4 mm higher than the given stamp size, to give an all around margin. Cut the width to your requirements.

3. HAWID cut-to-size mounts

For all common stamp sizes. Here, too, the stamp mount is 4 mm larger in size, so the stamp can be placed in the centre, as if in a frame.

Clear stamp mounts are ideal for e.g. organising pre-printed (illustrated) album pages. By contrast, stamp mounts featuring a black backing film highlight the stamp's perforated edge, showcasing the actual stamp.

3 ways to insert

HAWID stamp mount

Stamp can be inserted into the mount from either the side or the top. Ideal for unusual stamp sizes/shapes due to the "cut-to-size" mount.

Double weld (d) = sealed at the top and bottom:

Two parallel welds and a gummed base backing film. Stamps are inserted from the side. Meaning that the front cover does not open up, especially useful with larger stamp sizes.

Schaufix (s) = sealed at the top and bottom, opens at the back:

Two parallel seams and a gummed backing film that is cut through the middle enable larger sized stamps to be inserted easily and prevents the front from opening.

HAWID stamp mounts – all the benefits at a glance:

- ▶ **Years of experience in the production of stamp mounts**
- ▶ **"Made in Germany" quality**
- ▶ **Extensive range of stamp mounts**
- ▶ **Holds stamps securely thanks to the strong seam**
- ▶ **Maximum protection against sticking and discolouration, and from dust and moisture**
- ▶ **Material: strips made of 100% polystyrene (free from chemical softener, acid, stabilisers)**
- ▶ **Anti-glare coating prevents irritating light reflections**
- ▶ **Specially gummed on the back of the film (simply moisten and stick)**

Did you know?

Magnifiers with 2–3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

Magnifiers with 5–7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

Magnifiers with 10–20X magnification

You are now very close the Stamp Collectors ultimate piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

Folding magnifiers

Pocket folding magnifier 3X

Pocket folding magnifying glass, magnification 3X, and black, genuine leather pouch. The high-quality glass lens (diameter of lens: 40 mm/1 5/8") provides an image without distorting the edges.
